

## **Session 17**

## **Assignment 2 Questions**

# Session 17: Assignment 1

### **Table of Contents**

- 1. Introduction
- 2. Problem Statement
- 3. Output

#### 1. Introduction

This assignment will help you to consolidate the concepts learnt in the session.

#### 2. Problem Statement

Given a dataset of college students as a text file (name, subject, grade, marks):

#### **Dataset**

#### **Problem Statement 1:**

- 1. Read the text file, and create a tupled rdd.
- 2. Find the count of total number of rows present.
- 3. What is the distinct number of subjects present in the entire school
- 4. What is the count of the number of students in the school, whose name is Mathew and marks is 55

#### **Problem Statement 2:**

- 1. What is the count of students per grade in the school?
- 2. Find the average of each student (Note Mathew is grade-1, is different from Mathew in some other grade!)
- 3. What is the average score of students in each subject across all grades?
- 4. What is the average score of students in each subject per grade?
- 5. For all students in grade-2, how many have average score greater than 50?

#### **Problem Statement 3:**

Are there any students in the college that satisfy the below criteria:

 Average score per student\_name across all grades is same as average score per student\_name per grade

Hint - Use Intersection Property.

### 3. Output
